

**Your CSD Pool has just launched a new website providing districts with everything they need to respond to a data breach under the new Federal Red Flag or Colorado State Data Breach Statutes.**

**eRisk Hub™ content includes but is not limited to:**

- Personal data breach incident hotline
- Data breach incident road map
- Pre-qualified and preferred pricing resources for:
  - Legal
  - Forensic
  - Loss Mitigation
  - Corrective Action
  - Law Enforcement
  - Public Notification
  - Public Relations
  - Credit Monitoring Reports
  - ID Theft Counselors

Net Diligence is used by many major insurance companies to assess and mitigate cyber threats worldwide. Many industry leaders serve as pre-qualified resources at preferred rates.

**Access eRisk Hub™**

1. Visit the CSD Pool website at [csdpool.com](http://csdpool.com) and find the link in the News Block
2. [www.eriskhub.com/csdpool.php](http://www.eriskhub.com/csdpool.php)
3. Access Code: **09746**

**eRisk Hub™ delivers resources for Red Flag and Colorado state statute responses— with a \$200,000 limit!**

While eRisk Hub™ was specifically made available to Pool Members in response to personal data breach issues, it is so much more in that it is a live resource for the well-being of any technology department.

Members participating in the Liability Pool have a \$200,000 policy limit for covered cost, to help offset the expense of complying with state and federal statutes. Claims are handled just as other claims are handled— by notifying the Claims Administrator (CTSI), filling out a claim form, and taking the necessary actions to mitigate the claim and comply with the District’s responsibilities.
